

Below are some average figures of the amount of water one person in the United Kingdom might use.

Make a bar chart showing how much water is used for each activity.

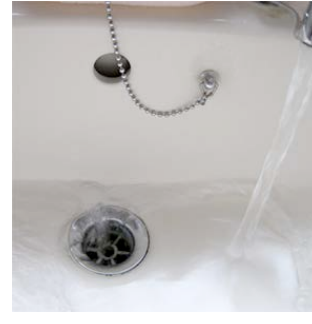

Shower
35 Litres

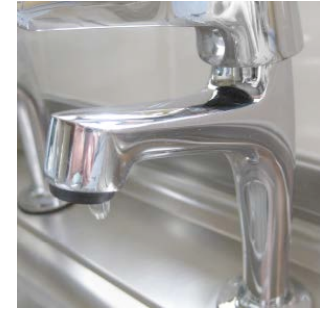

Bath
80 litres

Plug In
6 litres

Plug Out
8 litres

Dripping Tap
33 litres

Shower																			
Bath																			
Washing, plug in																			
Washing, plug out																			
Dripping tap (per day)																			
	5	10	15	20	25	30	35	40	45	50	55	60	65	70	75	80			

How many litres water could you save in one day if you stopped the dripping tap, took a shower instead of a bath, didn't leave the tap running when you brushed your teeth and had a wash in a bowl of water instead of under a running tap? _____
