

## How much water does your school use in one week?

You could measure the amount of water you use by putting a different coloured marble in a jar each time you do the following activity.

Activity	Litres	Monday		Tuesday		Wednesday		Thursday		Friday		Saturday		Sunday		Weekly totals for each activity
		No. of times	Total litres	No. of times	Total litres	No. of times	Total litres	No. of times	Total litres	No. of times	Total litres	No. of times	Total litres	No. of times	Total litres	
Example - flush the toilet	9	6	54	5	45	7	63	6	54	7	63	6	54	9	81	414
Flush the toilet	9															
Urinals	4															
Fill water bottle	0.5															
Wash your hands under running water	3															
Hot water urn	3.5															
School kitchen (per person)	10															
Use your washing machine (1 load)	85															
Use the dishwasher (ECO setting)	12															
Wash dishes by hand (one bowl)	6															
<b>Totals</b>																

Which activity used the most water? \_\_\_\_\_ Which activity used the least water? \_\_\_\_\_

See if you can work out how many bath tubs this would fill? \_\_\_\_\_
